Bangalore,Karnataka

Chandrashekhar

PROFILE SUMMARY

Skilled Python Backend Developer with a strong foundation in server-side logic, API development, and database management. Experienced in building secure, scalable, and high-performance backend systems using Django, Flask, and FastAPI. Proficient in RESTful API design, cloud deployment, and task automation using Celery and Redis. Committed to writing clean, maintainable code and collaborating with cross-functional teams to deliver robust backend solutions.

TECHNICAL SKILLS

Programming Languages
Python

Libraries/Frameworks
NumPy, Pandas, Django, Flask, FastAPI

Database
MySQL, PostgreSQL, MangoDB

Cloud Technologies
AWS - EC2, S3, IAM, EKS, ECR

API Testing
Postman, Swagger

Version Control
GitHub, Bitbucket

Methodologies
Agile, Scrum

Others
Kafka, Docker, Confluence, Bamboo, Jira, Git

WORK EXPERIENCE

SOFTWARE ENGINEER, *Sonata Software* 12/2024 – present
Currently working as Software Engineer at Sonata Software from July - 2023 to till date. Banglore,Karnataka, India

SOFTWARE ENGINEER, *LTIMindtree* 07/2021 – 06/2023
Previously worked as Software Engineer at LTIMindtree from Nov - 2020 to June - 2023. Hyderabad, India

Projects

Project 2: 07/2023 – present
Designation: Software Engineer
Client: Cisco
Technologies: Python, Django, RestAPI, MySQL, Pandas, Agile, Unittest

Roles & Responsibilities:

- **Backend Development**: Developed backend systems using Python and Django, and created REST APIs for managing data.

- **Database Management**: Designed MySQL databases for storing and retrieving data, ensuring data security and high performance.
- **Containerization & Deployment**: Used Docker to create consistent environments and simplify the deployment process.
- **Version Control & Collaboration**: Managed the codebase with Git, worked with teams, and participated in code reviews to ensure quality.
- **Agile Development**: Took part in Agile ceremonies like Sprint Planning and Daily Stand-ups to ensure project progress.
- **Testing & Quality Assurance**: Wrote unit tests using Unittest to ensure the reliability and quality of the backend services.
- **System Optimization**: Improved backend performance by optimizing database queries and code to handle large datasets with low latency

Project 1:
Designation: Software Trainee
Client: Honeywell International Inc
Technologies: Python, Flask, MySQL, GitHub, Unittest

Roles & Responsibilities:

- **Backend Development**: Built the backend using Flask and Python to manage data operations through efficient API requests and business logic.
- **Database Management**: Designed and optimized MySQL databases for storing data, ensuring integrity and performance.
- **Containerization**: Used Docker to containerize the application, ensuring consistency across all environments and simplifying deployment.
- **Version Control & Collaboration**: Managed the codebase with GitHub, handled pull requests, and collaborated with the team on feature development.
- **Agile Development**: Participated in Agile ceremonies like Sprint Planning and Daily Stand-ups to ensure smooth feature delivery.
- **Testing & Quality Assurance**: Wrote unit tests using Unittest to ensure backend reliability and followed Test-Driven Development (TDD) practices.
- **System Optimization**: Optimized backend code and database queries to improve performance and scalability for handling large data.

Education

Bachelor of Technology -Mechanical Engineering
Vellore Institute Of Technology, Vellore

Declaration

I hereby declare that the information provided in this resume is true and correct to the best of my knowledge and belief.
